

# BUMBLE BEE®

## Heavy Duty, Value Pricing

**B**umble Bee® cable protectors are designed to handle heavy duty applications while cutting cost and weight. Bumble Bees compare favorably to the specifications of other heavy duty cable protectors and offer the advantage of being made from Yellow Jacket, Inc.'s proprietary cast molded polyurethane, Durathane®.

### Economical Heavy Duty Cable Protection

#### Protect and Organize Cables, Lines and Hoses

Superior protection for electrical cables, hydraulic and pneumatic hoses and data, video and signal lines.

- Multi-channel design helps organize cables
- Rounded dividers protect cables from snags and tears
- Line of accessories to build a variety of configurations

*T-bone Connector*

#### Choice of Connectors

Bumble Bees are available with T-bone or dog bone\* connectors.

- T-bone connectors are designed for lighter weight cable protectors like the Bumble Bee. They form very tight connections to keep light weight protectors from separating under pressure, are shorter and reduce trip hazards.
- Bumble Bees with a dog bone connector will fit with Yellow Jacket® Classic and other cable protectors that use the dog bone connector. The dog bone connector is designed for heavier weight cable protectors and works best with the Yellow Jacket Classic.

#### Easy to Assemble and Load

- Single piece design
- Top hinged lid for easy access
- No tools or hardware required to configure

*dog bone Connector*

#### Very Durable

- Made from Durathane® – a proprietary cast molded polyurethane with superior tear and abrasion resistance, and dynamic load bearing properties. It is field proven in over 20 years of use.
- Resistant to oil and solvents
- Highly impact resistant

#### ADA Compatible Ramps

WASP™ ADA compatible special access ramps are available.

#### Safety Features

Bumble Bee cable protectors, while designed to protect cables, also offer these safety features:

- Highly visible - distinctive black lid and yellow ramps
- Skid resistant diamond pattern used on all upper surfaces
- Non-conductive, no metal parts

\* dog bone connector was designed by Yellow Jacket, Inc's parent corporation and is licensed to other manufacturers.

## Designed to Cut Weight and Cost

Bumble Bees provide cost effective solutions for applications with heavy foot and low speed vehicular traffic. Bumble Bee's key specifications compare favorably with other heavy duty cable protector.
