

FOX™

Rugged Cable Protection – “On the Go”

**The Compact
and Portable
Cable Protector
...Ideal for Field
Applications**

FOX™ cable protectors offer rugged “on the go” protection for a single cable or a small bundle of cables. The FOX™ series is built to withstand heavy vehicular traffic, use in the elements and is very easy to load. Due to their small footprint they are well suited for users who need to take cable protectors to the job site. The FOX™ series is designed for field applications such as utility repairs, welding trucks, small portable power generators, and construction companies.

Easy to Transport and Store

- Compact footprint takes up little room in storage or transit
- It will easily fit on a repair van or similar type of truck
- Single piece construction greatly reduces damage caused by frequent loading and unloading in field applications

Easy to Assemble, Easy to Load

- Top loading open channel makes for quick loading and unloading of cables, hoses and lines
- Just apply gentle foot pressure to connect FOX cable protectors together

Designed for a Single Cable or Small Cable Bundles

Its single channel provides a high degree of protection for a single cable or small cable bundle.

Superior Handling of Vehicular Traffic

Vehicular traffic produces the greatest impact on a cable protector’s leading edges and its ramps. FOX cable protectors are able to absorb significantly more impact from vehicles due to the design of their ramps. Key features of the ramps are:

- 1 1/2” leading edges which prevent tearing and ripping of the ramps, while absorbing the repetitive shock of wheels hitting it at all speeds
- Solid construction that enables them to withstand constant impact of very heavy vehicles moving over them

Slip Resistant Surface

The textured surfaces of the FOX™ series of cable protectors provide excellent traction.

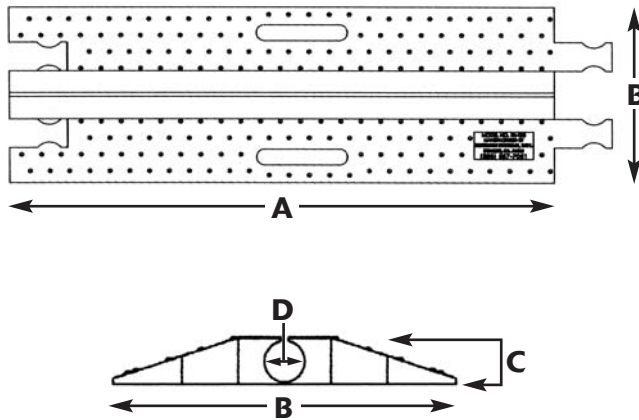

Excellent Durability

Made from Yellow Jacket, Inc.’s proprietary Durathane® cast molded polyurethane.

- Same material used in extra heavy duty Yellow Jacket® Classic cable protectors
- Proven in over 20 years of use

Drawings are representational and are not necessarily to scale.
