

# YELLOW JACKET<sup>®</sup> AMS<sup>®</sup>

## The "Build to Suit" Cable Protector System

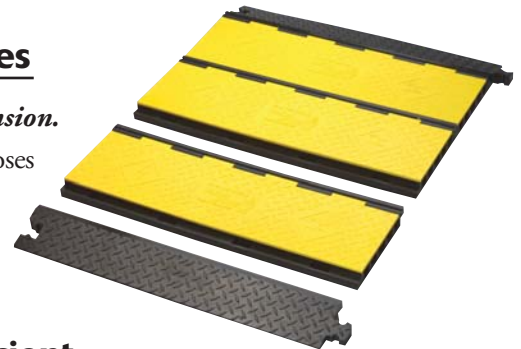

The **YELLOW JACKET. AMS<sup>®</sup>** (*Advanced Modular System*) is the first cable protector system\* designed to grow with a user's needs. Now a user can "build" a cable protector system on-site to:

- Accommodate additional cable runs
- Add ADA compatible ramps
- Tailor it for restricted floor space
- Interface with a broad range of existing cable protector systems
- Handle almost any traffic, from foot traffic to high speed, heavy vehicular traffic

### Holds An Unlimited Number of Cables

**YELLOW JACKET. AMS<sup>®</sup>** systems are designed for expansion.

- Protect an additional 5, 50 or more cables, lines or hoses
- Simply add more center sections to expand
- Each additional center section has five channels

### Space Efficient

**YELLOW JACKET. AMS<sup>®</sup>** protectors are the most space efficient cable protector systems in use, transit or storage.

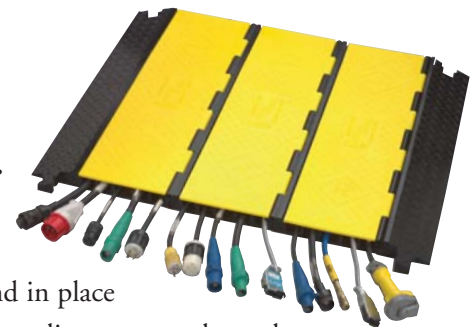

- The center section's straight edges reduce the space needed for multiple parallel cable runs
- One side of center section fits flush to a wall saving space and eliminating a potential trip hazard
- All ramps can be detached when not in use, requiring less space in transit and in storage

### Forms a Superfloor<sup>™</sup>

Connect parallel **YELLOW JACKET. AMS<sup>®</sup>** cable protectors together to create a Superfloor – a truly stable, flat surface.

- No gaps between parallel cable connectors
- Ramps are attached using Hipersnap<sup>®</sup> locking devices
- Hour Glass<sup>®</sup> connectors hold cable protectors in line and in place

The resulting Superfloor will stay connected under very demanding usage and greatly reduces any chance of trip hazards.

### Expandable ADA Compatible Ramps

**ADA compatible special access ramps provide unmatched stability and expandability.**

- Several ramps may be combined to form an extra wide ramp for easier access
- Ramps provide excellent access for forklifts and other small vehicles

**Yellow Jacket...  
Always the  
Innovator!**

## Connects with Other Cable Protectors

The **YELLOW JACKET. AMS**<sup>®</sup> connects directly to cable protectors using the dog bone connector\* with its AMS Transition<sup>™</sup>. The Transition<sup>™</sup>:

- Protects your investment in Yellow Jacket Classic and other cable protectors using the dog bone connector
- Is a fully functional, half-length (18") cable protector
- Has dog bone and Hour Glass<sup>®</sup> connectors on opposite ends
- Forms a strong, stable connection without gaps

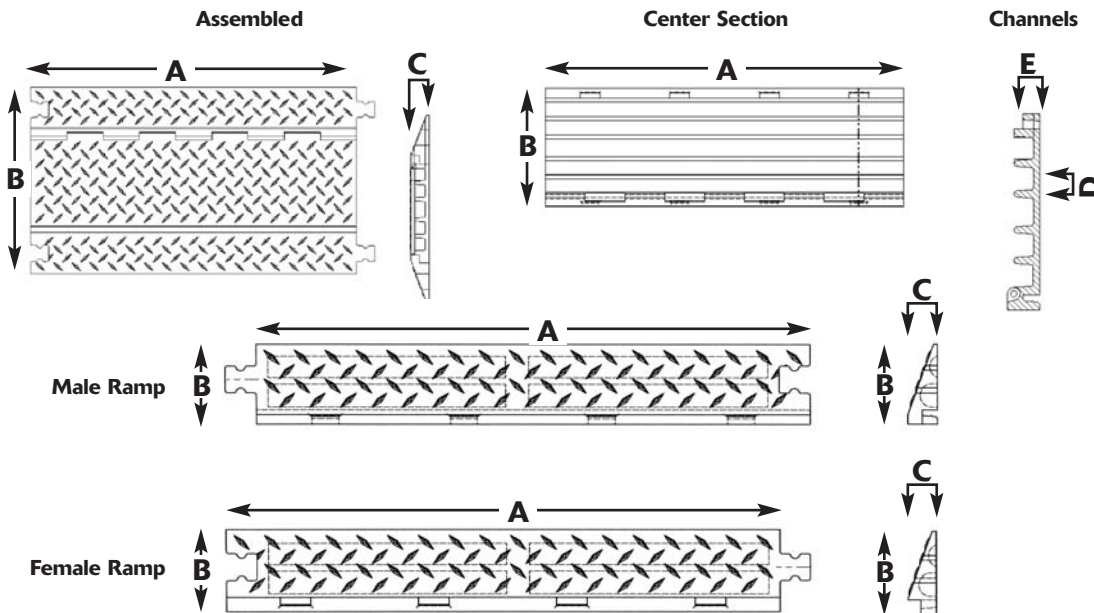

## Built with Yellow Jacket<sup>®</sup> Strength

The **YELLOW JACKET. AMS**<sup>®</sup> is built with the strength of the well known Yellow Jacket<sup>®</sup> Classic. Yellow Jacket's superior performance is due to its combination of:

- Long lasting proprietary Durathane<sup>®</sup> polyurethane
- Extra strong 2" leading edge with Roman Arch<sup>™</sup> construction
- A 3/8" thick lid and 3/8" thick base
- Low angle ramps that are easy for vehicles to cross

**YELLOW JACKET. AMS**<sup>®</sup> is the premier solution for protecting valuable cables and connectors, meeting ADA and other regulatory requirements.

*Drawings are representational and are not necessarily to scale.*

### Components and Dimensions (5 Channel System)

DESCRIPTION	MODEL #	Length (A)	Width (B)	Height (C)	Weight (lbs.)	Channels Width (D)	Height (E)
Assembled (center section and 2 ramps)	YJ5-125-AMS-ASSY	36"	22.5"	1.90"	28	1.25"	1.20"
Center Section	YJ5-125-AMS-CTR SEC	36"	12.0"	1.90"	16	1.25"	1.20"
Male Ramp	YJ5-125-AMS-M RAMP	36"	5.6"	1.90"	6.2	n/a	n/a
Female Ramp	YJ5-125-AMS-F RAMP	36"	4.9"	1.90"	6.1	n/a	n/a

All measurements and weights are nominal.

\* dog bone connector was designed by Yellow Jacket, Inc's parent corporation and is licensed to other manufacturers.
